

Mediterranean Journal of Mathematics
Vol. 10, No. 2(2013), pages 611 - 1140

Contents

D. Iacono and M. Manetti <i>Posetted Trees and Baker-Campbell-Hausdorff Product</i>	611-624
J. Liao, S. Yang and Y. Deng <i>On Connected $2-K_n$-Residual Graphs</i>	625-642
E. Ballico and L. Chiantini <i>Sets Computing the Symmetric Tensor Rank</i>	643-654
L. Mao <i>On Strongly Flat and Ω-Mittag-Leffler Objects in the Category $((R\text{-mod})^{op}, Ab)$</i>	655-676
B. Yang <i>A Half-Discrete Hilbert-Type Inequality with a Non-Homogeneous Kernel and Two Variables</i>	677-692
B. Bouras <i>Hankel Determinants of a Linear Combination of Three Successive Catalan Numbers</i>	693-706
A. A. Albanese and E. M. Mangino <i>One-Dimensional Degenerate Diffusion Operators</i>	707-730
K. Taira <i>Multiple Solutions of Semilinear Elliptic Problems with Degenerate Boundary Conditions</i>	731-752
H. Mejjaoli <i>Spectrum of Functions and Distributions for the Jacobi-Dunkl Transform on R</i>	753-778
J. M. Almira and K. F. Abu-Helaiel <i>A Note on Monomials</i>	779-790
T. He, W. Yang, H. Zhao and Y. Lei <i>Positive Periodic Solutions for Higher Order Functional Difference Systems Depending on a Parameter</i>	791-806
G. Mastroianni, I. Notarangelo and J. Szabados <i>Polynomial Inequalities with an Exponential Weight on $(0, +\infty)$</i>	807-822

A. Boccuto and X. Dimitriou <i>Modular Convergence Theorems for Integral Operators in the Context of Filter Eexhaustive-Ness and Applications</i>	823-842
P. Maroni and T. A. Mesquita <i>Cubic Decomposition of 2-Orthogonal Polynomial Sequences</i>	843-864
A. Saib and E. Zerouki <i>Some Inverse Problems for d-Orthogonal Polynomials</i>	865-886
H. Khaled and O. Slim <i>The Littlewood-Paley g-Function Associated with the Spherical Mean Operator</i>	887-908
M. Cichon and M. M. A. Metwali <i>On Monotonic Integrable Solutions for Quadratic Functional Integral Equations</i>	909-926
J. S. Raymond <i>Weak Compactness and Variational Characterization of the Convexity</i>	927-940
N. Samko <i>On a Muckenhoupt-Type Condition for Morrey Spaces</i>	941-952
J. Szirmai <i>On Lattice Coverings of Nil Space by Congruent Geodesic Balls</i>	953-970
G. Calvaruso and A. Zaeim <i>Geometric Structures Over Four-Dimensional Generalized Symmetric Spaces</i>	971-988
G. Bande, D. E. Blair and A. Hadjar <i>On the Curvature of Metric Contact Pairs</i>	989-1010
M. C. Lopez, P. M. Gadea and A. Swann <i>The Homogeneous Geometries of Real Hyperbolic Space</i>	1011-1022
F. Malek and M. B. K. Balgeshir <i>Slant Submanifolds of Almost Contact Metric 3-Structure Manifolds</i>	1023-1034
Y. Fu and A. I. Nistor <i>Constant Angle Property and Canonical Principal Directions for Surfaces in $M^2(c) \times R_1$</i>	1035-1050

A. Ghosh <i>Killing Vector Fields and Twistor Forms on Generalized Sasakian Space Forms</i>	1051-1066
C. Calin and M. Crasmareanu <i>Slant Curves in 3-Dimensional Normal Almost Contact Geometry</i>	1067-1078
F. Massamba <i>Symmetries of Null Geometry in Indefinite Kenmotsu Manifolds</i>	1079-1100
D. M. Halverson and D. Repovs <i>Decomposition of R^n, $n \geq 4$, into Convex Sets Generate Codimension 1 Manifold Factors</i>	1101-1106
R. Oset Sinha and M. del Carmen Romero Fuster <i>Graphs of Stable Maps from 3-Manifolds to 3-Space</i>	1107-1126
S. Montaldo and A. Ratto <i>A General Approach to Equivariant Biharmonic Maps</i>	1127-1140
