

Mediterranean Journal of Mathematics
Vol. 10, No. 3(2013), pages 1141 - 1606

Contents

P. Petrullo <i>Outcomes of the Abel Identity.....</i>	1141-1150
F. Vetro <i>Irreducible Components of Hurwitz Spaces of Coverings with Two Special Fibers.....</i>	1151-1170
A. Haghany, M. Gurabi and M. R. Vedadi <i>Modules whose Endomorphism Rings have Finite Triangulating Dimension and Some Applications</i>	1171-1187
B. Daoud, M. Hamitouche and K. Merikhi <i>On the Nilpotency Class of a Generalized 3-Abelian Group.....</i>	1189-1194
P. Niroomand and R. Rezaei <i>The Exterior Degree of a Pair of Finite Groups.....</i>	1195-1205
Y. Chen, X. Tang and X. He <i>Positive Solutions of Fractional Differential Inclusions at Resonance.....</i>	1207-1220
G. Mora and J. M. Sepulcre <i>The Zeros of Riemann Zeta Partial Sums Yield Solutions to $f(x) + f(2x) + f(nx) = 0$.....</i>	1221-1232
J. M. Cohen, F. Colonna and D. Singman <i>Carleson and Vanishing Carleson Measures on Radial Trees</i>	1233-1256
R. Chemmam <i>Asymptotic Behavior of Ground State Solutions of Some Combined Nonlinear Problems.....</i>	1257-1270
D. Sbibih, A. Serghini and A. Tijini <i>C^1 Quadratic and C^2 Quartic Macro-Elements on a Modified Morgan-Scott Triangulation.</i>	1271-1290
M. I. Tounsi, I. B. Salah and L. Khérifi <i>On the Symmetric H_q – Semiclassical Polynomial Sequences of Even Class. Some Examples from the Class Two</i>	1291-1314

G. A. Afrouzi, A. Hadjian and S. Heidarkhani <i>Infinitely Many Solutions for a Mixed Doubly Eigenvalue Boundary Value Problem</i>	1315-1329
B. Ahmad and S. K. Ntouyas <i>Existence of Solutions for Nonlinear Fractional q-Difference Inclusions with Nonlocal Robin (Separated) Conditions</i>	1331-1349
Z. Tan and F. Fang <i>Variable Exponent Sobolev Spaces for Semilinear Elliptic Systems</i>	1351-1365
L. Barreira and C. Valls <i>Stable Manifolds and Nonuniform Hyperbolicity: Optimal Estimates</i>	1367-1388
G. Z. Eskandani and T. M. Rassias <i>Hyers-Ulam-Rassias Stability of Derivations in Proper JCQ^* - Triples</i>	1389-1398
A. G. Garcia and A. Portal <i>Sampling in Reproducing Kernel Banach Spaces</i>	1399-1415
J. Motos, M. J. Planells and C. F. Talavera <i>A Note on Variable Exponent Hormander Spaces</i>	1417-1431
R. Cilia and J. M. Gutierrez <i>Asplund Operators and p-Integral Polynomials</i>	1433-1457
G. Bellomonte <i>Extensions of Representable Positive Linear Functionals to Unitized Quasi $*$-Algebras</i>	1459-1471
I. J. An and Y. M. Han <i>Property (aw) and Weyl's theorem</i>	1473-1484
M. Berkani <i>On the B-Fredholm Alternative</i>	1485-1494
H. Zguitti <i>A Note on Drazin Invertibility for Upper Triangular Block Operators</i>	1495-1505
D. O. Alexandrescu <i>A Characterization of the Fermat Point in Hilbert Spaces</i>	1507-1523
M. Onder and H. H. Ugurlu <i>Normal and Spherical Curves in Dual Space D^3</i>	1525-1535

T. Sato

Examples of Hermitian Manifolds with Pointwise Constant Holomorphic

Sectional Curvature.....1537-1547

A.Carriazo and V. Martin-Molina

Almost Cosymplectic and Almost Kenmotsu (κ, μ, ν) –Spaces.....1549-1569

Z. Virk

Realizations of Countable Groups as Fundamental Groups of Compacta.....1571-1587

B. B. Hamed

On the Robust Practical Global Stability of Nonlinear

Time-Varying Systems.....1589-1606
