

Mediterranean Journal of Mathematics
Vol. 12, No. 3(2015) pages 573-1198

Contents

S. S. Dragomir <i>Generalized Trapezoid Type Inequalities for Complex Functions Defined on Unit Circle With Applications for Unitary Operators in Hilbert Spaces.....</i>	573-591
J. Roojin and H. Dehghan <i>Some Monotonicity Properties of Convex Functions with Applications.....</i>	593-604
S. H. Saker, D. O'Regan and R. P. Agarwal <i>Littlewood and Bennett Inequalities on Time Scales.....</i>	605-619
D. Candeloro and A. R. Sambucini <i>Filter Convergence and Decompositions for Vector Lattice-Valued Measures.....</i>	621-637
S. B. Kaliaj <i>Some Full Characterizations of Differentiable Functions.....</i>	639-646
S. Ponnusamy and A. S. Kaliraj <i>Constants and Characterization for Certain Classes of Univalent Harmonic Mappings.....</i>	647-665
J. M. Sepulcre and T. Vidal <i>On the Analytic Solutions of The Functional Equations $W_1f(A_1z)+W_2f(A_2z)+\dots+W_N F(A_Nz)=0$.....</i>	667-678
W. A. Khan and M. A. Pathan <i>Some Implicit Summation Formulas and Symmetric Identities for the Generalized Hermite-Bernoulli Polynomials.....</i>	679-695
Y. Liu <i>Existence of Solutions of Boundary Value Problems for Coupled Singular Differential Equations on Whole Lines with Impulses.....</i>	697-716
K. Zhang <i>Nontrivial Solutions for an Impulsive Differential Equation with Non-Separated Boundary Conditions.....</i>	717-727
S. Currie, M. Nowaczyk and B. A. Watson <i>Inverse Scattering on the Line with a Transfer Condition.....</i>	729-750
J. Jiang, C.F. Li, D. Cao and H. Chen <i>Existence and Uniqueness of Solution for Fractional Differential Equation with Causal Operators in Banach Spaces.....</i>	751-769

L. Mahto and S. Abbas <i>Piecewise Continuous Almost Automorphic Solution of Impulsive Fractional Differential Equations.....</i>	771-790
D. D. Hai and J. L. Jahmario <i>Positive Radial Solutions for a Class of Singular P-Laplacian Systems in a Ball.....</i>	791-801
A. Kheloufi <i>On a Fourth Order Parabolic Equation in a Nonregular Domain Of R^3.....</i>	803-820
S. H. Rasouli <i>On a PDE Involving the Variable Exponent Operator with Nonlinear Boundary Conditions.....</i>	821-837
D. Lu <i>Existence and Concentration of Solutions for a Nonlinear Choquard Equation.....</i>	839-850
Y-Y. Lan <i>Existence of Solutions to a Class of Kirchhoff Type Equation with a General Subcritical Nonlinearity.....</i>	851-861
H. Yurt and A. Guven <i>Multivariate Approximation Theorems in Weighted Lorentz Spaces.....</i>	863-876
D. Leviatan, J. Sidon <i>Monotone Trigonometric Approximation.....</i>	877-887
R. Paltanea and G. Stan <i>Voronovskaja Theorem for Simultaneous Approximation by Bernstein Operators on a Simplex.....</i>	889-900
M. Cichon and M. M. A. Metwali <i>On Solutions of Quadratic Integral Equations in Orlicz Spaces.....</i>	901-920
A. Bellour, M. Boussalsal and E.H.A.Dads <i>Existence and Uniqueness of the Solution for Some Double Delay Integral Equations.....</i>	921-938
O. Galdames Bravo <i>On the Norm with Respect to Vector Measures of the Solution of an Infinite System of Ordinary Differential Equations.....</i>	939-956
E. Kikianty and C. C. A. Labuschagne <i>On The Hadamard's Sequence Spaces $H^p(X)$ and the \$P\$-Summing Operators.....</i>	957-972
A. Dalet <i>Free Spaces Over Some Proper Metric Spaces.....</i>	973-986

R. Giova and M. R. Formica <i>Boyd Indices in Generalized Grand Lebesgue Spaces and Applications.....</i>	987-995
G. Bellomonte <i>Extensions of Representable Positive Linear Functionals to Unitised Quasi *-Algebras: a New Method.....</i>	997-1008
F. Mukhamedov and K. K. Kudaybergenov <i>Local Derivations on Subalgebras of τ-Measurable Operators with Respect to Semi-Finite Von Neumann Algebras</i>	1009-1017
A. Ammar, F. Abdmouleh, T. Alvarez and A. Jeribi <i>Spectral Mapping Theorem for Rakocevi, and Schmoeger Essential Spectra of a Multivalued Linear Operators.....</i>	1019-1031
S. Zivkovic-Zlatanovic, M. D. Cvetkovic and D. S. Djordjevic <i>On Closed Upper and Lower Semi-Browder Operators.....</i>	1033-1045
J. C. Ramos-Fernandez, R. E. Castillo and C. E. Marrero-Rodriguez <i>On a Criterion for Continuity and Compactness of Composition Operators on the Weighted Bloch Space.....</i>	1047-1058
G. Li, G. Hai and A. Chen <i>Generalized Weyl Spectrum of Upper Triangular Operator Matrices.....</i>	1059-1067
A. Zachos <i>Solving a Generalized Gauss Problem.....</i>	1069-1083
C-J. Zhao and W. S. Cheung <i>On Reverse Minkowski Type Inequalities.....</i>	1085-1094
Z. Sadeghi, S. M. Vaezpour and R. Saadati <i>Existence of Solutions for a Differential Inclusion by Multivalued Probabilistic Order Contraction.....</i>	1095-1106
M. Pamuk, F. Hegenbarth and D. Repovs <i>S-Cobordism Classification of 4-Manifolds Through the Group of Homotopy Self-Equivalences.....</i>	1107-1121
K. Nouri and H. Ranjbar <i>Mean Square Convergence of the Numerical Solution of Random Differential Equations.....</i>	1123-1140
F. J. Mhlanga <i>Calculations of Greeks for Jump Diffusion Processes.....</i>	1141-1160
M. Eslamian <i>Strong Convergence of a New Multi-Step Algorithm for Strict Pseudo-Contractive Mappings and Ky Fan Inequality.....</i>	1161-1176

M. Selmani

A Frictional Contact Problem Involving Piezoelectric Materials

with Long Memory.....1177-1197
