

Mediterranean Journal of Mathematics
Vol. 13, No. 2(2016) pages 517-884

Contents

O. Furdui and C. Valean <i>Evaluation of Series Involving the Product of the Tail of $\zeta(k)$ and $\zeta(k+1)$</i>	517-526
B. Ammou, S. Driss and M. Hbaib <i>Continued Fractions and Transcendence of Formal Power Series Over a Finite Field</i>	527-536
M. Fošner, B. Marcen and N. Širovnik <i>On Certain Identity Related to Herstein Theorem</i>	537-556
M-S. Abdelouahab and N-E. Hamri <i>The Grünwald-Letnikov Fractional-Order Derivative with Fixed Memory Length</i>	557-572
I. Roventa <i>Hardy-Littlewood-Polya's Inequality and a New Concept of Weak Majorization</i>	573-583
S. H. Saker, R. R. Mahmoud and A. Peterson <i>Weighted Hardy-Type Inequalities on Time Scales with Applications</i>	585-606
S. Ponnusamy, S. K. Sahoo and N. L. Sharma <i>Maximal Area Integral Problem for Certain Class of Univalent Analytic Functions</i>	607-623
J. Wang and X. Li <i>A Uniformed Method to Ulam-Hyers Stability for Some Linear Fractional Equations</i>	625-635
T. Guendouzi and S. Farahi <i>Approximate Controllability of Semilinear Fractional Stochastic Dynamic Systems with Nonlocal Conditions in Hilbert Spaces</i>	637-656
P. Caldiroli and G. Cora <i>Entire Solutions for a Class of Fourth Order Semilinear Elliptic Equations with Weights</i>	657-675
M. Allaoui and A. Ourraoui <i>Existence Results for a Class of $p(x)$-Kirchhoff Problem with a Singular Weight</i>	677-686
T. Augusta Mesquita and P. Maroni <i>Two-Orthogonal Polynomial Sequences as Eigenfunctions of a Third Order Differential Operator</i>	687-701

M. B. Salah, K. Ezzinbi and A. Rebey <i>Pseudo-Almost Periodic and Pseudo-Almost Automorphic Solutions to Evolution Equation in Hilbert Spaces.....</i>	703-717
S. Jung, E. Ko and J. E. Lee <i>Remarks on Complex Symmetric Operators.....</i>	719-728
S. László <i>On Injectivity of a Class of Monotone Operators with Some Univalency Consequences.....</i>	729-744
N. Teofanov <i>Continuity and Schatten-von Neumann Properties for Localization Operators on Modulation Spaces.....</i>	745-758
R. Arab <i>The Existence of Fixed Points Via the Measure of Noncompactness and its Application to Functional Integral Equations.....</i>	759-773
B. Schultz and J. Szirmai <i>Densest Geodesic Ball Packings to $S^2 \times \mathbb{R}$ Space Groups Generated by Screw Motions.....</i>	775-788
S. S. Shukla and A. Yadav <i>Screen Pseudo-Slant Lightlike Submanifolds of Indefinite Sasakian Manifolds.....</i>	789-802
C. Ida and P. Popescu <i>On Almost Complex Lie Algebroids.....</i>	803-824
T. Mestdag <i>Finsler Geodesics of Lagrangian Systems Through Routh Reduction.....</i>	825-839
X. Han and Y. Zhu <i>A Practical Method for Generating Trigonometric Polynomial Surfaces Over Triangular Domain.....</i>	841-855
M. Sofonea, D. Danan and C. Zheng <i>Primal and Dual Variational Formulation of a Frictional Contact Problem.....</i>	857-872
M. Kule <i>Controllability of Affine Control Systems on Lie Groups.....</i>	873-882
A. Kazan and H.B. Karadag <i>Erratum to: Paracontact Tangent Bundles with Cheeger-Gromoll Metric.....</i>	883-884
