

M.Z. Petrović and L. S.Velimiroić

Generalized Almost Hermitian Spaces and Holomorphically

Projective Mappings.....pag. 1-20 Article

A. Tsarev

Laws of the Lattices of σ -Local Formations of Finite Groupspag. 1-13 Article

P.Alegre,J. Barrera and A. Carriazo

A New Class of Slant Submanifolds in Generalized Sasakian

Space Forms.....pag. 1-18 Article

D. Costarelli and G. Vinti

Voronovskaja Type Theorems and High-Order Convergence

Neural Network Operators with Sigmoidal Functions.....pag. 1-23 Article

R. Pei and C. Ma

Multiple Solutions for a Kirchhoff-Type Equation.....pag. 1-16 Article

F. Zeng

Symmetric Properties for System Involving Uniformly Elliptic Nonlocal

Operators.....pag. 1-17 Article

F. Sancho de Sales and J.F. Torres Sancho

Derived Categories of Finite Spaces and Grothendieck Duality.....pag. 1-22 Article

C. Sayar

Generalized Skew Semi-invariant Submersions.....pag. 1-21 Article

L. Boccardo and L. Orsina

Existence Results for a System of Kirchhoff–Schrödinger–Maxwell

Equations.....pag. 1-22 Article

I. R. Kayumov and K.- J Wirths

Inequalities of Carlson Type for α -Bloch Functions.....pag. 1-9 Article

J. Roth

Extrinsic Eigenvalues Estimates for Hypersurfaces in Product Spaces.....pag. 1-13 Article

M.Mslameni

Linearized Navier–Stokes Equations with Boundary Conditions Involving the Pressure in an

Exterior Domain of $\{\mathbb{R}\}^3$pag.1-18 Article

F. Orecchia and I. Ramella

Ordinary Isolated Singularities of Algebraic Varieties.....pag. 1-30 Article

O. M. Ibrahim and M.N. O. Ikhile

A Generalized Family of Symmetric Multistep Methods with Minimal Phase-Lag for Initial Value

Problems in Ordinary Differential Equations.....pag. 1-30 Article

H. Damak, M. A. Hammami and A. Kicha

A Converse Theorem on Practical h -Stability of Nonlinear Systems.....pag.1-18 Article

E. Matsushashi and T. Yamanaka

Inverse Limits with Upper Semi-continuous Bonding Functions Whose

Inverse Functions are Continuous.....pag. 1-19Article

F. Etayo and R. Santamaria

Classification of Almost Golden Riemannian Manifolds with Null Trace.....pag.1-19 Article

K. Bal and P. Garaian

Multiplicity of Solution for a Quasilinear Equation with Singular

Nonlinearity.....pag. 1-20 Article

S. Sivasubramanian

On a Closely Related Class Involving Spirallike Functions

with Respect to a Boundary Point.....pag.1-12 Article

S. Verma an P.Viswanathan

A Fractalization of Rational Trigonometric Functions.....pag. 1- 23 Article

Z. Kamali and F. Abtahi

The Bochner -Schoenberg -Eberlein Property for Vector-Valued ℓ_p -Spaces.....pag. 1-18 Article

Y.D. Ri, H.C. Choi and K. J. Chang

Constructive Existence of Solutions of Multi-point Boundary Value Problem for Hilfer Fractional Differential Equation at Resonance.....pag, 1-20 Article

C. J. Zhao

The Log-Aleksandrov -Fenchel Inequality..... .pag. 1-14 Article

H. Fan

Multiple Positive Solutions for the Fractional Schrödinger -Poisson

Systems Involving Singular Terms.....pag. 1-28 Article

A. Cattabriga and E. Horvat

Knot Quandle Decompositions.....pag. 1-12 Article

L. Antoniotti, F. Caldarola and M. Maiolo

Infinite Numerical Computing Applied to Hilbert ' s, Peano ' s, and Moore ' s

Curves.....pag. 1- 19Article
