

D.R.Jocić and M. Lazarević

Cauchy–Schwarz norm inequalities for elementary operators and inner product type transformers generated by families of subnormal operators.....pag.1-22Article:49

S. Xu andG. Zhang

Positive Solutions for a Second-Order Nonlinear Coupled System with Derivative Dependence Subject to Coupled Stieltjes Integral Boundary Conditions.....pag.1-23 Article:50

D.Ariza-Ruiz and J. Garcia-Falset

Periodic Solutions to Second-Order Nonlinear Differential Equations in Banach Spaces.....pag.1-17 Article:51

A.Arenas, Ö.Ciaurri and E. Labarga

Weighted Transplantation for Laguerre Coefficients.....pag.1-21Article:52

A. Favini S.A. Zagrebina and G.A. Sviridyuk

The Multipoint Initial–Final Value Condition for the Hoff Equations on Geometrical Graph in Spaces of K - “noises”.....pag.1-19 Article:53

A.L.M. Castañeda

A Compactification of the Universal Moduli Space of Principal G -Bundles.....pag.1-19 Article:54

M.Nielsen

Unconditional Bases for Homogeneous α -Modulation Type Spaces.....pag.1-18 Article:55

I.B. Gorshkov

Characterization of Groups with Non-simple Socle.....pag.1-10 Article:56

H.Yang and R. Fu

A Further Note on Jeśmanowicz’ Conjecture Concerning Primitive Pythagorean Triples.....pag.1-8 Article:57

S. Roy,S. Bagehi and D. sain

Birkhoff–James Orthogonality in Complex Banach Spaces and Bhatia–Šemrl Theorem Revisited.....pag 1-15 Article:58

O. Yikhz

Generating the Mapping Class Group by Two Torsion Elements.....pag.1-23 Article:59

X. Zhang and X Zhao

Norm of the Backward Shift on the Lipschitz Space of a Tree.....pag.1-12 Article:60

S.E. Rihane

k-Pell Numbers as Product of Two Repdigits.....pag.1-14Article:61

- F.J.S.A. Corrèa, R.N. de Lima and A.B. Nòbrega**
On Positive Solutions of Elliptic Equations with Oscillating Nonlinearity in $\mathbb{R}^N$pag.1-19 Article:62
- K.Hasine**
Uniqueness of Radial Solutions for a Class of Non-autonomous k -Hessian Equations in a Ball.....pag.1-10 Article:63
- B.Boulfoul and S.Djebali**
A Measure of Weak Noncompactness in $L^1(\mathbb{R}^N)$ and Applications.....pag.1-17 Article:64
- M.Crasmaream**
The Diagonalization Map as Submersion, the Cubic Equation as Immersion and Euclidean Polynomials.....pag.1-22 Article:65
- B.Bouras, Y Habbachi and F. Marcellàn**
Characterizations of the Symmetric $T(\theta, q)$ -Classical Orthogonal q -Polynomials.....pag.1-18 Article:66
- L.C.Paes-Leme and B.M. Rodrigues**
Existence of a Positive Solution for a Class of Non-local Elliptic Problem with Critical Growth in $\mathbb{R}^N$pag.1-13 Article:67
- A.Sommariva and M.Vianello**
Near-Optimal Polynomial Interpolation on Spherical Triangles.....pag.1-17 Article:68
- T.Akeb, N. Challali and O.Mellah**
Almost Periodic Solutions in Distribution to Affine Stochastic Differential Equations Driven by a Fractional Brownian Motion.....pag.1-32 Article:69
- H.Khodaiemehr and F. Sady**
Maps Preserving Drazin Invertible Operator Matrices with Non-singular Schur Complement.....pag.1-19 Article:70
- Y.Li**
Existence of Multiple Positive Solutions for a p -Kirchhoff Problem with Singular Nonlinearity.....pag.1-16 Article:71
- G.Choi and S.K. Kim**
The Bishop–Phelps–Bollobás Property on the Space of c_0 -Sum.....pag.1-16 Article:72
- R. kulaev**
The Qualitative Theory of Fourth-Order Differential Equations on a Graph.....pag.1-16 Article:73
- S.Falkensteiner, Y. Zhang and T.N. Vo**
On Existence and Uniqueness of Formal Power Series Solution of Algebraic Ordinary Differential Equations.....pag.1-16 Article:74

Z Hu and G.Yang

New Characterizations of the Whitney Spheres and the Contact

Whitney Spheres.....pag.1-14 Article:75

L.Liang and G.Yang

Constructions of Frobenius Pairs in Abelian Categories.....pag.1-17 Article:76

V. Lampret

Simple Derivation of the Euler–Boole Type Summation Formula and

Examples of its Use.....pag.1-20 Article:77

S.S.Byun and K. Song

Maximal Integrability for General Elliptic Problems with Diffusive

Measures.....pag.1-20 article:78

A.Bouregghda,A. Choutri andH.Rezgui

On Domain Error Truncation in a Problem of Guided Modes

Computation in Optical Fibers.....pag.1-22Article:79

R.Ng’ambi andP.Ntumba

Involutions on Sheaves of Endomorphisms of Locally Finitely Presented OX

-Modules.....pag.1-23 Article:80

G.Tutberidze

Sharp (Hp,Lp) Type Inequalities of Maximal Operators of T Mean

s with Respect to Vilenkin Systems.....pag.1-23Article:81

N.S.Papageorgiou.V.D. Rădulesco and Y.Zhang

Strongly Singular Double Phase Problems.....pag.1-21Article:82

G.Zhao and W. Gou

Limiting Weak-Type Behaviors for Fractional Maximal Operators

and Fractional Integrals with Rough Kernel.....pag.1-15Article:83

M.D’Anna, R. Jafari and F. Strazzanti

Simplicial Affine Semigroups with Monomial Minimal Reduction Ideals.....pag.1-17Article:84

A.Kumar,J.R. Cardoso and G.Singh

Explicit Solutions of the Singular Yang–Baxter-like Matrix Equation and Their Numerical

Computation.....pag.1-19Article:85

J.M.Casas and X.Garcia-Martines

On the Capability of Hom-Lie Algebras.....pag.1-21Article:86

D. Baralić and L.Milenković

Small Covers and Quasitoric Manifolds over Neighborly Polytopes..... pag.1-31Article:87

G.Martinez-Cervantes and J.Rodriguez

On Weak-Extensible Subspaces of Banach Spaces.....pag.1-6 Article:88*

Y.Rostami and K.Maleknejad

The Solution of the Nonlinear Mixed Partial Integro-differential Equation via Two-Dimensional Hybrid Functions.....pag.1-20Article:89

H.-Y.Zhang,J. Ao and M. Li

Dependence of Eigenvalues of Sturm–Liouville Problems with Eigenparameter-Dependent Boundary Conditions and Interface Conditions.....pag.1-17Article:90

A.T. Duong and V.H. Nguyen

A Liouville-Type Theorem for Fractional Elliptic Equation with Exponential Nonlinearity.....pag.1-16Article:91

P. Saracco

Universal Enveloping Algebras of Lie–Rinehart Algebras as a Left Adjoint Functor.....pag.1-19Article:92

M.Elin and F.Jacobson

Families of Inverse Functions: Coefficient Bodies and the Fekete–Szegő Problem.....pag.1-17Article:93

E. Bergman and R.S. Coulter

Constructing Functions with Low Differential Uniformity.....pag.1-22 Article:94
