|                                                                                                                                  |     |
|----------------------------------------------------------------------------------------------------------------------------------|-----|
| F. De Mari and F. de Giovanni<br><i>Noetherian Automorphisms of Groups</i> .....                                                 | 125 |
| P. Aiena and M.T. Biondi<br><i>Browder's Theorems Through Localized SVEP</i> .....                                               | 137 |
| I. Rasa<br><i>One-Dimensional Diffusions and Approximation</i> .....                                                             | 153 |
| H. L. Pedersen<br><i>On the Remainder in an Asymptotic Expansion of the Double Gamma Function</i> .....                          | 171 |
| L. Dieci, M.G. Gasparo and A. Papini<br><i>Continuation of Singular Value Decompositions</i> .....                               | 179 |
| A.El Kinani, M. A. Nejjari and M. Oudadess<br><i>Results of Vidav-Palmer Type in <math>m</math>-Convex Algebras</i> .....        | 205 |
| E. Saucan<br><i>Note on a Theorem of Munkres</i> .....                                                                           | 215 |
| V. Drensky and G. Genov<br><i>Multiplicities in the Trace Cocharacter Sequence of Two <math>4 \times 4</math> matrices</i> ..... | 231 |
