

Mediterranean Journal of Mathematics
Vol.20 No.6, 2023 – Articles - pp.1-880

<http://link.springer.com/journal/volumesAndIssues/9>

G. Vannella

Uniform L^∞ -Estimates for Quasilinear Elliptic Systems.....pag.1-11Article:289

L. Fernández and M. D. de la Iglesia

QBD Processes Associated with Jacobi–Koornwinder Bivariate Polynomials and Urn Models.....pag.1- 23Article:290

A. Hanani

Gradient and Hessian Estimates for the HermitianMonge–Ampère Equation.....pag.1- 13Article:291

D. Drissi

Sequences Behavior and Applications.....pag. 1-12Article:292

M. Ahmia and J. L. Ramírez

Some Positivities in Stirling Arrays with Higher Level.....pag. 1- 16 Article:293

M. F. Ali and S. Pal

Schwarzian Norm Estimates for Some Classes of Analytic Functions.....pag.1-14Article:294

C. Gil Canto, D. Martín Barquero,C.Martin Gonzàles I. Ruiz Campos

Correction: On Isomorphism Conditions for Algebra Functors with Applications to Leavitt Path Algebras.....pag.1-2Article:295

U.Bruzzo, B. Graña Otero and D. Hernández Ruipérez

On a Conjecture About Higgs Bundles and Some Inequalities.....pag.1-15 Article:296

S. Maji and S. Natesan

An Efficient Numerical Method for Fractional Advection–Diffusion–Reaction Problem with RLC Fractional Derivative.....pag.1-25 Article:297

C. Li, R. Saadati and Z. Eidinejad

Fixed Point Results for the Fractional Nonlinear Problem with Integral Boundary Condition.....pag.-1-15 Article:298

J. Cai, P. Xu and L. Xu

Asymptotic Behavior of Solutions for Multi-stable Equation with Dirichlet Boundary Condition.....pag.1- 20Article:299

F. Esposito, L. Selicato and C. Sportelli

Theoretical Aspects in Penalty Hyperparameters Optimization.....pag. 1- 13Article:300

A. A. Teali

Spacetime Linear Canonical Transform and the Uncertainty Principles.....

pag. 1-19Article:301

F. Talimdjioski

Lipschitz-Free Spaces over Cantor Sets and Approximation Properties.....

pag.1-16Article:302

H. M. Ahmed

Numerical Solutions of High-Order Differential Equations with Polynomial Coefficients Using a Bernstein Polyno Basis.....

pag.1-31Article:303

D. Barseghyan and B. Schneider

Spectral Convergence of the Laplace Operator with Robin Boundary Conditions on a Small Hole.....

pag.1-18 Article:304

A. J. Guirao V. Montesinos and A. Quilis

On Projectional Skeletons and the Plichko Property in Lipschitz-Free Banach Spaces.....

pag.1-25 Article:305

Z. Bi and S.Liu

Positive Solutions for Third-Order Boundary Value Problems with Indefinite Weight.....

pag.1-18Article:306

A. Miralles and M. P. Maletzki

The Constant of Interpolation in Bloch Type Spaces.....

pag.1-15 Article:307

S. Salem and A.M. Hassan

Oscillatory Behavior of Solutions of Third-Order NonlinearNeutral Delay Dynamic Equations on Time Scales.....

pag. 1- 30Article:308

M. Feng

Positive Solutions for Biharmonic Equations: Existence, Uniqueness and Multiplicit.....

pag. 1-22 Article:309

T. Hibi and S. Saeedi Madani

Diameter and Connectivity of Finite Simple Graphs

pag. 1-11 Article:310

M. Krnić, H.R. Moradi and M.Sababheh

On Superquadratic and Logarithmically Superquadratic Functions.....

pag. 1-18 Article:311

H. Benbouziane, A. Daoudi, M.E.-C.E. Kettani and I. El Khchin

Maps Preserving the $\backslash$ (partial $\backslash$)-Spectrum of Product or Triple Product of Operators.....

pag.14- Article:312

H. Zhao and M. Zhu

Critical and Supercritical Adams' Inequalities with Logarithmic Weights.....

pag.1-22Article:313

O. Abad and H. Zguitti

Correction and Addendum to: "On the Generalized Drazin–Riesz Inverse for Closed Linear Operators.....

pag. 1- 5 Article:314

A.Jakhar, S. Kaur and S. Kumar

On Power Basis of a Class of Number Fields.....pag.1-11Article:315

M.E. Marriaga, T. E. Pérez and M. J. Recarte

Simultaneous Approximation via Laplacians on the Unit Ball.....pag.1-22 Article:316

J.A. Adell

Series Acceleration via Negative Binomial Probabilitie.....pag.1-14 Article:317

L.M.M. Alvarez, A.M. García, M.P. À. Alejandro and R.A. Blaya

Two Spheres Uniquely Determine Infrabimonogenic Functions.....pag.1-12 Article:318

M. Hassan

Global Numerical Bounds for the Number-Theoretic Omega Functions.....pag.1-17Article:319

P. Lucas and J.A. Ortega-Yagües

Concircular Hypersurfaces and Concircular Helices in Space Forms.....pag.1-13Article:320

M. Huang, X. Zhang and X. Zhao

Toeplitz Operators on $(\mathcal{L}^p)$ -Spaces of a Tree.....pag.1-18Article:321

M. E. Mera and M. Morán

Irregularity Index and Spherical Densities of the Penta-Sierpinski Gasket.....pag.1- 24 Article:322

I. Oner

The Null Boundary Controllability for a Fourth-Order Parabolic Equation with Samarskii–Ionkin-Type Boundary Conditions.....pag.1-16Article:323

Q. Cui and Z. Hu

On 2-Hopf Hypersurfaces in Nonflat Complex Planes.....pag.1-17Article:324

P.Wang and C. Duan

Gradient Estimates and Liouville Type Theorems for a Weighted Nonlinear p -Laplacian Equation on Compact Smooth Metric Measure Spaces.....pag.1-14 Article:325

Peter Goričan Žiga Virk

Critical Edges in Rips Complexes and Persistence.....pag.1-25 Article:326

Hafida Benallal Mohammed Benalili

On the Morse Index of Harmonic Maps.....pag.1-15 Article:327

M. Jleli and B. Samet

A Wave Inequality with Convolution Nonlinearities.....pag.1- 25Article:328

D. Lei

The Indices of the p -Sylowizers and the p -Supersolvability of Finite Groups.....pag.1- 9Article:329

A. Mao Shuyao Lu

Normalized Ground States for the Schrödinger Equation with Hartree Type and Square-Root Nonlinearities.....pag.1- 10Article:330

V.Marraffa and B. Satco

Relaxation Theorem for Stieltjes Differential Inclusions on Infinite Interval.....pag.1- 23Article:331

M.F. Arikan

Contact Symplectic Fibrations and Bundle Contact Structures.....pag.1-13 Article:332

C. Sanna

On the Inverse of a Fibonacci Number Modulo a Fibonacci Number Being a Fibonacci Number..... .pag.1-11 Article:333

K. Q. Wang and Q.-M. Zhou

Multiple Positive Solutions for Nonlinear Eigenvalue Problems Involving $p(x)$ -Laplacian-Like Operators.....pag.1-16 Article:334

P. Catuogno, L. Lima and P. Ruffino

Geometric Aspects of Young Integral: Decomposition of Flows.....pag.1-20 Article:335

T.O. Alakoyaand O.T. Mewomo

Mann-Type Inertial Projection and Contraction Method for Solving Split Pseudomonotone Variational Inequality Problem with Multiple Output Sets.....pag.1-33 Article:336

H. Zhu, C. Wang and Q.-W. Wang

Left w -Core Inverses in Rings with Involution.....pag.1-20 Article:337

S. Basu, J. B. Guerrero, S. Seal and J.M. V. Yeguas

Non-rough Norms and Dentability in Spaces of Operators.....pag.1-14 Article:338
