

Mediterranean Journal of Mathematics

Vol. 3(2006), No. 2, pages 119 – 343

A special issue originated from the

International Mediterranean Congress of Mathematics Almería 2005

Almería, Spain, June 6 - 10, 2005

Contents

Contributions of the plenary speakers:

I. Bauer, F. Catanese and F. Gruneward

Chebycheff and Belyi polynomials, dessins d'enfants, Beauville surfaces and group theory,
..... 119

V. Agoshov, P. Gervasio and A. Quarteroni

Optimal control in heterogeneous domain decomposition methods for advection-diffusion equations,..... 145

Contributions of the main speakers of the thematic sessions:

A. Cañada, J. A. Montero and S. Villegas

Lyapunov-type inequalities for differential equations,175

G. Di Maio, E. Meccariello and S. Naimpally

Duality in function spaces,187

J. R. van Dorp, A. Singh and T. A. Mazzucchi

The Doubly-Pareto uniform distribution with applications in uncertain analysis and econometrics,203

S. Holmgren, S. Serra-Capizzano and P. Sundqvist

Can one hear the composition of a drum ?,.....223

J. F. Jardine

Torsors and stacks,247

José M. Llavona

Approximation methods by regular functions,255

C. Martínez

Infinite Dimensional Lie and Jordan Algebras,269

C. Sempi

A short and partial history of probabilistic normed spaces,279

P. F. Smith and A. R. Woodward

On finitely annihilated modules and Artinian rings,299

G. Tironi	
<i>Pseudoradial spaces: results and problems,</i>	311
G. Valent	
From asymptotics to spectral measures: determinate versus indeterminate moment problems,	325
