

Mediterranean Journal of Mathematics
Vol. 8, No. 4 (2011), pages 463 - 636

Contents

A. Abouelaz and F. Rouvière <i>Radon Transform on the Torus</i>	463-471
G. Di Lena, D. Franco, M. Martelli and B. Messano <i>From Chaos to Global Convergence</i>	473-489
P. Aiena, J. R. Guillén and P. Peña <i>Property (R) for Bounded Linear Operators</i>	491-508
P. P. Ntumba and A. C. Anyaegbunam <i>A-transvections and Witt's theorem in symplectic A-modules</i>	509-524
P. V. Danchev and P. W. Keef <i>An Application of Set Theory to $w + n$-Totally p^{w+n}-Projective Primary Abelian Groups</i>	525-542
B. Ivanković, J. Pečarić and S. Varošanec <i>Properties of Mappings Related to the Minkowski Inequality</i>	543-551
I. A. Aliev and S. Bayrakci <i>Square-Like Functions Generated by a Composite Wavelet Transform</i>	553-562
A. Aghajani and Y. Jalilian <i>Existence of Nondecreasing Positive Solutions for a System of Singular Integral Equations</i>	563-577
Y. Liu <i>Studies on Nonhomogeneous Multi-Point BVPs of Difference Equations with One-Dimensional p-Laplacian</i>	579-605
B. Ben Hamed, I. Ellouze and M. A. Hammami <i>Practical Uniform Stability of Nonlinear Differential Delay Equations</i>	607-620
M. A. Gómez-Molleda and J-C. Lario <i>Sharply k-Transitive Permutation Groups Viewed as Galois Groups</i>	621-636
